

Patient-Assistance Program (PAP) Resource

Please note that the Health Safety Net (HSN) is **not insurance**. Uninsured or underinsured HSN patients may be eligible to receive brand medications through manufacturer patient-assistance programs, if available. The following table identifies some of the largest drug manufacturers and the link to their patient assistance programs.

For manufacturers not listed below, please refer to the drug manufacturer’s website for more information on patient-assistance programs.

Manufacturer	Link to Patient-Assistance Program*
AbbVie	https://www.abbvie.com/patients/patient-support/patient-assistance/available-programs.html
