

Unified Management of Drugs through the Medical Benefit

Managed care organizations (MCOs) and accountable care partnership plans (ACPPs) must unify prior authorization (PA) requirements for five therapeutic classes: complement inhibitors, multiple myeloma, multiple sclerosis, oncology immunotherapies, and targeted immunotherapies, unless otherwise specified by EOHHS. Management of these drugs must follow management and PA criteria as specified in the MassHealth Drug List. The table below notes drugs included in these classes that require PA, as of January 2026.
