

MassHealth Brand Name Preferred Over Generic Drug List

This is the list of brand name drugs that MassHealth prefers over their generic equivalents because the net cost of the brand name drugs adjusted for rebates is lower than the net cost of the generic equivalents.

Please note that MassHealth may still require prior authorization (PA) for clinical reasons. Drugs that require additional PA requirements are noted with “PA” on this list.

In general, MassHealth requires a trial of the preferred drug or clinical rationale for prescribing the non-preferred drug generic equivalent.

This list may be updated often and is subject to change at any time.
