

## MassHealth Preferred Non-Drug Product List

This page lists those non-drug products for which MassHealth has entered into a rebate agreement with product manufacturers, allowing MassHealth the ability to provide coverage of non-drug products at the lowest possible costs.

The products are listed alphabetically by therapeutic class, then by the name of the non-drug product. Please note that MassHealth may still require prior authorization for clinical reasons. Products that require additional prior authorization requirements are noted with PA on this list.
